- Fibre-optic connectivity
- Totally redundant power supply
- Fully air-conditioned office and boardroom space
- A range of other commercial amenities

 Innovation Drive, Flora Hill, Bendigo, Victoria

 www.latrobe.edu.au/cvip

Situated in the heart of Central Victoria, only three kilometres from the Bendigo CBD and 90 minutes from Melbourne, the Central Victorian Innovation Park (CVIP) is the first publicly funded, University endorsed, technology and innovation based Business Park in Victoria. The CVIP was developed with financial assistance from the Victorian Government through the Regional Infrastructure Development Fund.

The Park supports a commercial environment unique to the region. By assisting the growth and potential of local, innovative companies operating in the Information and Communications Technology arena, it has significantly enabled the development of a number of IT-orientated businesses in central Victoria.

Bendigo Community Telco, the anchor tenant at the CVIP, has installed world-class communications infrastructure to deliver unparalleled business continuity services for regional companies, and offsite facilities to protect businesses across Australia. Current tenants of the CVIP support a range of additional innovative products and services in areas such as software development, web content management and portal solutions.

The relationship between the CVIP and La Trobe University provide collaborative opportunities for pure and applied research, structured student involvement on project activity and the commercialisation of Intellectual Property.

The CVIP is currently exploring options for the development and utilisation of up to another four buildings on the site. For more information on the CVIP, including a full tenant directory, please visit us at www.latrobe.edu.au/cvip

The Information and Communication Technology (ICT) Centre, located prominently in the Bendigo CBD, is a site of the CVIP. Solutions provided by tenant companies at the ICT Centre include web-delivered learning management platforms, ICT consulting services and products managing the process of stakeholder engagement.

For more information on the ICT Centre, including a full tenant directory, please visit us at www.latrobe.edu.au/ictcentre

Park Area = 2.55 hectares Building Area (current) = 974 square meters
