

## **PRIMER v6 and PERMANOVA+ software costs for the La Trobe workshop, Wodonga, 13-17 Dec 2010**

1) There are two products, separately priced. The PRIMER v6 software should be familiar to most participants, since some knowledge of this is advisable for the workshop. PERMANOVA+ is an 'add-on' package to PRIMER 6, and can only be installed subsequent to installation of PRIMER 6.

2) All licences are single-user and registered to a specified individual, who may install the software on both their lab desktop and their laptop or home machine, provided both are not in simultaneous use. There are no site licences for either product. (There is a multi-seat teaching licence for purely teaching purposes, not for a post-graduate's individual research machine – for prices see [www.primers-e.com](http://www.primers-e.com) or contact [admin@primers-e.com](mailto:admin@primers-e.com))

3) Ownership of both products, or purchase in connection with the workshop, is naturally recommended for all participants (otherwise knowledge of how to use them seems a little superfluous!). Ownership, however, is not a pre-requisite for course registration, because the lab sessions will take place in a computer laboratory, with the PRIMER and PERMANOVA+ software installed on teaching machines. Participants without licences who wish to bring their own data to the course, to try out before deciding on purchase, should do so on a CD or USB stick.

4) By comparison with list prices (see [www.primers-e.com](http://www.primers-e.com) - which do not include carriage costs), participants are offered a sizeable discount on purchase of PRIMER v6 and a smaller discount on PERMANOVA+. There is a further saving of currency conversion costs here because the workshop prices have been set in AUD\$, not the GB pounds of the list price. An additional courier cost of AUD\$40 has been included in all the following prices:

PRIMER v6:	New, academic (university), single-user licence:	\$420
	New, public sector (Depts, museums, etc), single-user licence:	\$610
	New, fully commercial, single-user licence:	\$800
	Licensed v5 users can upgrade to v6 at 50% of the above prices	

PERMANOVA+ 'add-on' to existing v6:	Academic, single-user:	\$260
	Public sector, single-user:	\$370
	Commercial, single-user:	\$480

5) If you are planning on upgrading from v5 or purchasing PERMANOVA+ for an existing v6 licence please check on your current licence position with PRIMER-E, namely Cathy or Marg at [admin@primers-e.com](mailto:admin@primers-e.com).

6) If ordered in advance, software may be sent to individual addresses (full street address - not a box number - and contact phone number required) or to the workshop venue to be collected at the start of the week. A few extra copies will be available during the week, on a first-come first-served basis, for those wishing to try out the software before purchase. People bringing a laptop to the course, and collecting or purchasing software there, should ensure that they have administrator rights on their PC; installation will then be simple and quick. All Windows 2000 through to Windows 7 operating systems are supported (including 64-bit machines). There are no native Mac versions though the software will run under Windows emulation and well on Parallels machines.

7) The course materials include a hard-copy booklet of the overheads from the PERMANOVA+ lectures but do **not** include the hard-copy manuals which come automatically with software purchase, namely:

- (i) 'PERMANOVA+ for PRIMER: Guide to Software & Statistical Methods' (2008), 216pp, which comes with PERMANOVA+;
- (ii) 'Change in Marine Communities' (2001), 200pp, and the 'PRIMER v6 User Manual/Tutorial' (2006), 190pp, which both come with PRIMER v6.

8) **Rachel Bahrij** ([r.bahrij@latrobe.edu.au](mailto:r.bahrij@latrobe.edu.au)) will collect all software fees for orders prior to the workshop, along with the course fees. You may also order this software after the workshop at the above prices (but only if you are a participant, or your supervisor is purchasing it for you). In this case software orders should be placed with Cathy or Marg at the PRIMER-E office in the UK, [admin@primers-e.com](mailto:admin@primers-e.com), not with Rachel.
