

La Trobe University
Academic Development Unit
Quality Assurance of Units
School of Educational Studies

Campuses: Onshore (Albury Wodonga, Bundoora and Shepparton)

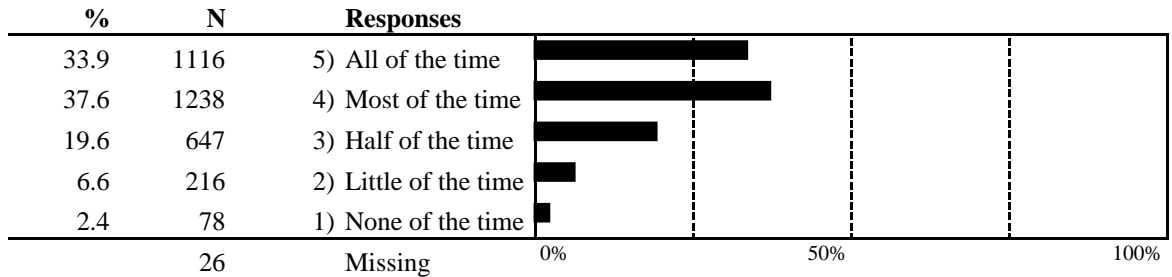

Offshore (Hanoi and Ho Chi Minh City)

Total number of responses: N = 3321

Semesters: 1 & 2

Year: 2006

1 Overall I was satisfied with this unit

Mean = 3.9

Standard deviation = 1.003

Interpretation of the Data

N - This represents the sample size (number of students who have responded to the unit evaluation overall).

Mean - The mean score represents the numerical average for the set of students' responses.

Standard Deviation (SD) - SD represents the distribution of the students' responses around the mean. It indicates the degree of similarity among the students' responses. A small SD reflects a high degree of consensus among the students. On the other hand, a large SD shows that there is considerable disagreement among the students' responses.
