

## 2008 Professional Development Program

# Customised Professional Development at Your Preferred Location

The Faculty of Education at La Trobe is proud of its record in providing a wide range of professional development opportunities both locally and internationally for teachers, industry professionals and the community in general. It is the diversity and difference within this Faculty that constitutes one of its most important strengths. Programs offered by the Faculty range from undergraduate, through to Graduate Diploma, Masters and Doctoral levels, reflecting contemporary approaches in a variety of areas relevant to education and the environment. Professional Development programs and short courses are a speciality of this Faculty and can be arranged on campus at Melbourne (Bundoora), Bendigo, Albury-Wodonga, Shepparton or Mildura, or at your preferred location.

We invite you to contact us to discuss your needs. Staff of the Faculty can work collaboratively with your school or other educational institution, community or industry group to provide a short course tailored to your needs or provide guidance in an action research project.

Below are areas of strength together with relevant academic staff expertise available to work with your school, other institution or group. Follow the link to the staff profile for more details.
