## How to use guide

### Looking for something else?

Like a hairdresser, a mechanic, or a dentist?  
Yellowpages is a great way to find a shop or business.

1. Go to <http://yellowpages.com.au>, and enter the type of business you are looking for, and area you are in.

2. You may be asked to choose between suburbs with the same name, in two different states. Choose VIC for Victoria.

3. The results of your search will be displayed. You can browse through the different companies to learn more about them, or you can pick one using the map (and choose the closest to you).

You can also refine your search using the yellow bar on the left side of the screen. For example, in this search you might want to limit results to only mechanics that look after Holden cars. You can do this by clicking 'Make' and choosing your brand of car.

**Yellow** Find by  business type  name Location
