Questionnaire Responses:

Answers to set questions:

Summaries of the statistics were not compiled by ADU due to an insufficient number of student responses. Even so, for the questions which requested a rating on a 1 to 5 scale, with 5 being the most positive outcome, 24% of answers were 5's, 35% were 4's and 20% were 3's. The average score for the lecturer was 6 on a scale of 1 to 7.

Issues raised by students:

Very few comments were provided by students.

Positive comments

The assignments and the range of remote sensing techniques covered were a good feature of the course.

Negative comments

Some problems occurred in arranging the availability of notes on WebCT

Actions taken:

Problems with access to material on WebCT will be addressed.

Feedback to students:

Outcomes will be provided on website.
