(230000) Mathematical Sciences

ARC Centre of Excellence for Mathematics & Statistics of Complex Systems - Administered by University of Melbourne

Professor Gilles Quispel

Aspects of Polynomial Interpolation

Dr Simon Smith

Axiomatic Foundations of Hyperbolic Geometry

Dr John Schutz

Braille Conversion Project

Ms Liddy Nevile

Professor Edgar Smith

Casual Modelling and its application to some problems in Environmental Impact Assessment

Dr Warren Paul

Games & Mathematical Learning

Professor Peter Sullivan

Models of congestion in hospitals

Mr Peter Goddard

Professor Terence Mills

Patient flow models in emergency care

Dr Robert Champion

Mr Leigh Kinsman

Mrs Geraldine Lee

Professor Terence Mills

Problems of duality for semigroups and other algebras

Dr Marcel Jackson

Raychaudhuri's Equation

Dr Geoffrey Prince

Reproducing Kernel Hilbert Spaces

Professor Terence Mills

Statistical analysis of length and cost of stay in hospital

Professor Terence Mills

Statistical methods for patient satisfaction

Professor Terence Mills

Statistical Model Selection

Dr Paul Kabaila

Symmetries of the Variational Complex

Dr Geoffrey Prince

The axiomatisation of topological prevarities

Dr Brian Davey
Dr Marcel Jackson

The Inverse problem in the Calculus of Variations

Dr Geoffrey Prince

The oscillation of a loaded spring

Dr Robert Champion

Time Series Prediction Intervals

Dr Paul Kabaila

Two fundamental problems in the theory of natural dualities

Dr Brian Davey

(240000) Physical Sciences

**ARC Centre of Excellence - Coherent X-ray Science - Administered by
The University of Melbourne**

Dr Andrew Peele
Dr Michael Ryan
Professor Leann Tilley

Axiomatic foundations of general relativity

Dr John Schutz

Band structures and electron scattering in conducting solids

Professor John Riley
Professor Robert Leckey

Brownian motion in colloids: algorithm construction

Professor Edgar Smith

Charge diffusion in reduced dimensions

Professor Edgar Smith

Coupling of x-ray orbital angular momentum to matter

Dr Andrew Peele

High Resolution Phase Tomography

Dr Andrew Peele

**High resolution Fermi surface studies of magnetic alloys, utilising angle-
resolved photoemission spectroscopy with a synchrotron light source**

Dr Nathaniel Janke-Gilman
Professor John Riley

High Resolution Phase Tomography

Dr Andrew Peele
Ms Benedicta Arhatari

Investigations of SiC surfaces as templates for quantum wires

Professor Robert Leckey

On energy, inertia and electrodynamics

Dr John Schutz

On fluctuations of the electromagnetic field

Dr John Schutz

Studies on Brown Coals- Removal of ash fouling constituents; and catalytic gasification

Dr Bruce James

Dr John Liesegang

Synchrotron Measurements for Iluka Resources and Mayne Pharmaceuticals

A/Prof Paul Pigram

Dr Peter Kappen

The Application of Numerical Techniques to Musical Acoustics

Dr Joseph Petrolito

Dr Katherine Legge

The quantum tunnelling time controversy

Dr John Schutz

Tomographic imaging of SiC inclusions in Ni-coatings

Dr Andrew Peele

Tomographic survey of a human femur

Dr Andrew Peele

Victorian Centre for Advanced Materials Manufacturing

A/Prof Paul Pigram

Dr Andrew Peele

Dr Narelle Brack

X-ray micro-tomography facility

A/Prof Paul Pigram

Dr Andrew Peele

Dr Bruce James

Dr John Liesegang

Dr Narelle Brack

Dr Sheila Crewther

XRL for Lobster II

Dr Andrew Peele

(250000) Chemical Sciences

3-D Structure of Antibiotics

Professor Robert Brownlee

Acid-base properties of synthetic goethite

Dr John Wells

Analysis of explosive residues

Dr Jeffrey Rowe

Catalytic steam gasification of low-rank coals

Dr Bruce James

Chemistry of systems containing the carbon - nitrogen double bond

Dr Jeffrey Rowe

Density Functional Theory Calculations for Metal / Molecular Systems

Dr Graeme Nyberg

Digital Electrochemistry

Mr Darrell Elton

Drug/DNA Interactions

Professor Robert Brownlee

Effects of pesticides on the adsorption of metal ions by clay minerals

Dr Bruce Johnson

Dr Michael Angove

Orthophosphate adsorption on mineral surfaces

Dr Bruce Johnson

Polymer microspheres for extraction applications and sensing applications

Dr Ian Potter

Preparation of N-aryl derivatives of amino acid

Dr Jasim Al-Rawi

Proposal to investigate arsenic and mercury concentrations in Bendigo Creek

Dr Michael Angove

Redox potential measurements in environmental systems using one-electron sensor molecules

Dr Ewen Silvester

Structural Chemistry of Heavy Metal Halogen Derivatives

Dr Bruce James

Structure of antifungal drugs

Professor Robert Brownlee

Structure of polysaccharides

Professor Robert Brownlee

Studies of Gas-Phase Ionization and Fragmentation Mechanisms

Dr John Traeger

Synthesis of antimalarials and the combinatorial search for medicines

Dr Andrew Hughes

Dr Michael Foley

Professor Robert Brownlee

Synthesis, identification and biological evaluations of new 1, 3-benzoxazines and their derivatives with amines, alcohols and grignard reagents

Dr Christopher Bradley

Dr Jasim Al-Rawi

The phase behaviour of binary mixtures

Dr David Morton

Dr Matthew Lui

The Structure of Anti-Fungal Agents containing N-Methylated Peptides

Professor Robert Brownlee

Thermochemistry of Gas-Phase Ions by Photoionization Mass Spectrometry

Dr John Traeger

(260000) Earth Sciences

A new instrument to observe the three dimensional structure of wind and temperature disturbances at and above Earth's polar mesopause

Dr Mark Conde

Professor Peter Dyson

Buckland Park Lidar Facility - administered by University of Adelaide

Dr Mark Conde

Professor Peter Dyson

Carboniferous tetrapods

Dr Anne Warren

Chromium geochemistry of the former Hardcrome site, South Melbourne

Dr John Webb

Climatic impact on watertables/lake levels within the Glenelg-Hopkins Catchment

Dr John Webb

Dual radar studies of sub-auroral magnetosphere-ionosphere coupling

Professor Peter Dyson

Evolution of the detached westward flow channels observed with TIGER HR radars

Dr Roman Makarevich
Professor Peter Dyson

Genesis of Granite Rocks

Dr Christopher Gray

Geology of the Glenelg River Complex

Dr Christopher Gray

Hydrogeochemistry of Cleanaway landfill, Tullamarine

Dr John Webb

Hydrogeological assessment of Alansford site

Dr John Webb

Hydrogeological assessment of proposed Learmonth Abattoir Site

Dr John Webb

Image Database of Box-Ironbark Pollen Flora

Dr Katherine Legge
Dr Robert Glaisher
Dr Sabine Wilkens

Inversion of Ionospheric Backscatter Radar data in order to Map & Model the Ionosphere

Professor Peter Dyson

Inversion of Over-The-Horizon Radar (OTHR) data to obtain 3-D maps of ionospheric electron density

Dr Murray Parkinson
Professor Peter Dyson

Investigation of the ultrastructure of the ostracode carapace

Dr Kenneth Bell
Mr John Neil

Investigations of Space Weather and the Mesosphere using the TIGER Radar

Dr John Devlin
Dr Murray Parkinson
Dr Roman Makarevich
Professor Peter Dyson

Origins & development of the Naracoorte Cave Range Karst

Dr Ruth Lawrence

Origins of Salt in the Upper Loddon Catchment, central Victoria

Dr John Webb

Radio wave absorption and ionospheric electric field

Dr Roman Makarevich

Small scale processes in Earth's mesosphere and thermosphere in the auroral zone

Dr Mark Conde

Mr Theodore Davies

Professor Peter Dyson

Studies of the ionosphere and plasmasphere of the earth

Professor Peter Dyson

Study of E-region irregularities using coherent and incoherent radars

Dr Roman Makarevich

Surface, river and groundwater interaction along the Murrumbidgee River from Wagga to Narrandera

Mr Martin Fussell

Taxonomy, palaeoecology and ecology of the fossil and recent ostracodal and foraminiferal faunas of Southern Australia

Dr Kenneth Bell

Mr John Neil

Temnospondyl phylogeny

Dr Anne Warren

The origin of asymmetrical gaits in synapsid vertebrates

Dr Peter Pridmore

Tracing the origin of salinity and quantifying its future changes in the eastern Hopkins Catchment, western Victoria

Dr John Webb

Upper atmosphere dynamics and thermodynamics

Dr Mark Conde

Mr Theodore Davies

Professor Peter Dyson

(270000) Biological Sciences

A Study of avian ecology and mating systems

Dr Michael Clarke

AAA+ proteases: substrate binding, translocation and modulation by novel adaptor proteins

Dr Kaye Truscott

**Aerodynamic performance of feathertail glider *Acrobates pygmaeus*
(Marsupialis: Acrobatidae)**

Dr Peter Pridmore

**Alpine plant recruitment processes: the implications of a changing
climate**

Dr John Morgan

**Alpine plant regeneration processes: the implications of a changing
climate**

Dr John Morgan

**An analysis of mammalian mitofusins as mediators of mitochondrial
morphology**

Dr Ann Frazier
Dr Michael Ryan

**Analysis of disease resistance to *Puccinia Conorata* F.Sp.holli in
perennial ryegrass using candidate gene-based markers**

Professor Roger Parish

**Analysis of polymorphisms in the promoter region of the tumour
necrosis factor alpha gene in poplar**

Dr Graham Flannery

Analysis of Sodium signalling pathways in *Arabidopsis*

Dr Anthony Gendall

Anti-mitochondrial antibodies in primary biliary cirrhosis

Dr Graham Flannery

Arsenic in Bogong Moths

Dr Susan Lawler

**Avian diversity and insect induced die-back in remnant eucalypt
woodlands**

Dr Michael Clarke

**Behavioural Interactions of Small Mammals in the Victorian Alpine
Environment**

Dr Peter Pridmore
Dr Richard Sandeman

Biomolecular discrepancy and translation into diagnostic products

Professor Heddy Zola
Professor Nick Hoogenraad

**Breeding biology of short-tailed shearwaters, *Puffinus tenuirostris*, in
the Furneaux group of Islands, Bass Strait, Tasmania**

Dr Catherine Meathrel

Buffalo River Catchment Survey

Dr Susan Lawler

Butterfly Ecology
Professor Timothy New

Candidate gene-based marker analysis of biotic stress tolerance in perennial ryegrass - Scholarship for Jeremy Dumsday supported by Plant Biotechnology Centre
Mr Jeremy Dumsday
Professor Roger Parish

Candidate Gene-Based Marker Development & Validation in White Clover - Scholarship Julie George Plant Biotechnology Centre
Professor Roger Parish

Career Development Award
Dr Christine Hawkins

Caspase Inhibitors in Leukemogenesis and therapy - Centre Grant from Leukaemia and Lymphoma Society (US) - Administered by WEHI
Professor David Vaux

Centre Grant: - administered by WEHI: Analysis of Cell death in gene KO and transgenic mice
Professor David Vaux

Characterisation of a mitochondrial unfolded protein response
Dr Tomohisa Horibe
Professor Nick Hoogenraad

Characterisation of a novel pre-clinical anti-cancer drug - Cancer Council vacation studentship
Dr John Silke

Characterisation of calpain-3 in skeletal muscle
Dr Robyn Murphy
Professor Graham Lamb

Characterization on the XERO2 system in Arabidopsis thaliana
Professor Roger Parish

Comparative muscular anatomy of anaurans
Dr Thomas Burton

Comparative phylogeography of forest invertebrate species
Dr Neil Murray
Dr Paul Sunnucks

Conservation and evolution of Freshwater crayfish
Dr Susan Lawler

CRC Molecular Plant Breeding Agreement - Shamila Abeynayake
Professor Roger Parish

CRC Molecular Plant Breeding Agreement - Yi Tu

Professor Roger Parish

CRC Molecular Plant Breeding Student Agreement - Peter Dracatos

Professor Roger Parish

CRC Molecular Plant Breeding Student Agreement - Yingying Cao

Professor Roger Parish

Dealing with an indigenous despot - the Noisy Miner, a keystone species in the rural landscape of eastern Australia

Dr Michael Clarke

Deciphering gene regulatory networks in pollen development and viability

Professor Roger Parish

Demographic vulnerability of a specialised life-history: Implications of spatial and trophic overlap in foraging effort between Australian sea lions and commercial fisheries

Dr Simon Goldsworthy

Deployment of transgenic technologies in forages

Professor Roger Parish

Desert Vines: A comparison of Australia with other areas.

Dr Robert Parsons

Determining appropriate fire mosaics for biodiversity conservation in mallee ecosystems

Dr Brian Malone

Dr John Morgan

Dr Michael Clarke

Professor Timothy New

Determining optimum physiological ranges of temperature for freshwater fish

Dr Peter Frappell

Developing bioassays for heavy metal pollution in urban waterways: QTL mapping for heavy metal resistance in Chironomids

Dr Yvonne Parsons

Development and application of tools for Brassica and Arabidopsis genome comparison and annotation

Dr Trevor Whiffin

Professor Roger Parish

Development of a web site for Australian tropical rain forest plants.

Dr Trevor Whiffin

Diagnosis of sheep nematodes by faecal antigen elisa

Dr Richard Sandeman

Differentiation in human leukaemic cell lines: molecular mechanisms and use as a model for cancer therapy

Dr Graham Flannery

Discovery of novel circular proteins in bacteria, plants and animals: applications in drug design and crop protection. (Administered by the University of Queensland)

Professor Marilyn Anderson

Dissection of the mechanisms of action of evolutionarily conserved apoptotic pathway components

Dr Christine Hawkins

Diurnal patterns in stream water constituents as indicators of peatland condition

Dr Ewen Silvester

DNA evolution in marsupials and monotremes

A/Prof Michael Westerman

Do omega-3 fatty acids regulate mechanisms controlling body fluid balance in ageing?

Dr Richard Weisinger

Early Carboniferous fossil Fish Communities

Dr Anne Warren

Ecological entomology

Dr Seamus Ward

Effect of selected amino acids on calcium uptake by, and release from sarcoplasmic reticulum of striated muscle fibres

Dr Philip Dooley

Environmental stress profiling (ESP): Molecular profiling of sediment microbial communities for improved biological monitoring in aquatic ecosystems

Dr Yvonne Parsons

Erythroleukaemia K562 as a model for chemical induction of cellular commitment and differentiation

Dr Graham Flannery

Evaluation of the influence of proprietary compounds on body fat, blood pressure, glucose tolerance and cholesterol

Dr Richard Weisinger

Factors influencing the vegetation composition, structure and hydrological function of highland peatlands in eastern Victoria

Dr John Morgan

Faecal analysis of Teladorsagia and Oesophogastomum infections in sheep

Dr Richard Sandeman

Fast inhibition and neural coding of frequency: new strategies for auditory brainstem implant development

Dr Antonio Paolini

Fission, fusion and distribution of mitochondria in mammalian cells

Dr Michael Ryan

Flowering in Legumes

Dr Anthony Gendall

Flowering time in Arabidopsis

Dr Anthony Gendall

Freshwater algae and protozoan - taxonomy and ecology

Dr Roger Croome

Functional characterization of myb genes involved in the control of anther and pollen development

Professor Roger Parish

Functional Genomics of Fructan Biosynthesis in Grasses

Mr Nik Cummings

Professor German Spangenberg

Professor Roger Parish

Functional genomics of function metabolism in ryegrass

Professor Roger Parish

Functional Symbiogenomics: Endophyte Metabolomics in Ryegrass - Scholarship for Pei Tian - Plant Biotechnology Centre

Professor Roger Parish

Gene delivery to the mitochondrial and mitochondrial gene therapy

Dr Chee Chan

Genetic characteristics of the Pacific Gull *Larus pacificus* in Victoria

Dr Catherine Meathrel

Genetic characteristics of the Pacific Gull *Larus pacificus pacificus* in Victoria

Dr Catherine Meathrel

Genetic Fragmentation in *Banksia marginata*

Dr John Morgan

Dr Neil Murray

Genetically engineered reversible male sterility in canola

Dr Song Li

Professor Roger Parish

Germination in native grasses

Dr Peter Pridmore
Dr Warren Paul

Gibberellins and pollen tube growth

Professor Roger Parish

Greenland Plagiosavrid Temnospondyls

Dr Anne Warren

Habitat profiles for selected Australian Aquatic Invertebrates

Dr Phillip Suter

HAR-affinity maturation

Dr Michael Foley

HAR-Libraries

Dr Michael Foley

Homeostatic regulation of IAP RING finger proteins and its relevance to tumour therapy

Dr John Silke

Impacts of fire history on small terrestrial vertebrates inhabiting roadside grasslands in western Victoria

Dr Brian Malone

Improving the accuracy and intelligibility of decisions for conversation using the informed regulator rule.

Professor Geoffrey Cumming

Insect Conservation Protocols in Australia

Professor Timothy New

Insect resistance in plants

Professor Marilyn Anderson

Is there a Na/Ca exchanger in the sarcoplasmic reticulum of striated muscle fibres?

Dr Philip Dooley
Dr Travis Dutka

Key factors that make a site attractive to colonisation by Bell Miners

Dr Michael Clarke

Kin recognition in the Bell Miner, *Manorina melanophrys*, and its function in the evolution of cooperation, group cohesion and tolerance.

Dr Michael Clarke

Kinematics of swimming and submerged walking in short- and long-bodied lungfishes

Dr Peter Pridmore

Life History Adaptation in the Australian Sea Lion

Dr Neil Murray

Major kistocompatibility antigen expression and lysis of allogeneic cells by allospecific natural killer cells

Dr Graham Flannery

Mammalian mitofusins as mediators of mitochondrial morphology - suspended from 1 June 05 to 31 May 07 new end date will be 28/02/09

Dr Michael Ryan

Manipulation of developmental leaf senescence in LACTUCA SATIVA cv. seagreen

Professor Roger Parish

Masters Project

Professor Roger Parish

Mechanisms in apoptosis and tumorigenesis - administered by WEHI

Professor David Vaux

Microbial Communities of wetting and drying sediments

Dr Phillip Suter

Mitochondrial respiratory complexes and human disease

Dr Matthew McKenzie

Dr Michael Ryan

Molecular basis of antimicrobial and insecticidal activity of floral defensins from the Solonaceae.

Professor Marilyn Anderson

Molecular basis of mitochondrial Complex 1 deficiency, the most common energy generation disorder

Dr Michael Ryan

Molecular basis of the antifungal and antimalarial activity of a plant defensin

Professor Marilyn Anderson

Molecular dissection of herbage quality forage crops

Professor Roger Parish

Molecular Ecology of Spiders

Dr Neil Murray

Molecular Ecology of the Bogong Moth

Dr Neil Murray

Molecular relationships of bandicoots

A/Prof Michael Westerman

Morphologic and genetic relationships of the geographically isolated populations of the Pacific Gull *Larus pacificus* in Australia

Dr Catherine Meathrel

Morphology and genetic relationships of the geographically isolated pacific gull *Larus pacificus* populations in Australia

Dr Catherine Meathrel

Mycosociology and ectomycorrhizae of myrtle beech (*Nothofagus cunninghamii*) in Victoria

Dr Philip Keane

Neoplasia and development

Dr Graham Flannery

Oxidative stress-induced alterations of the host erythrocyte by the malaria parasite

Dr Nectarios Klonis
Professor Leann Tilley

Phylogenetic Relationships of Dasyurines

A/Prof Michael Westerman

Phylogenetic relationships of Sminthopsines

A/Prof Michael Westerman

Pollen Development in Plants

Professor Roger Parish

Population dynamics of the endangered growling grass frog (*Litoria raniformis*)

Dr Brian Malone

Population Ecology of the endangered Growling Grass Frog (*Litoria raniformis*) within an urban-fringe landscape

Dr Brian Malone

Population genetics study of Giant Gippsland Earthworm *Megascolides australis* at Loch Hill

Dr David Runciman
Dr Neil Murray

Post fire monitoring of terrestrial invertebrates on the Bogong High Plains

Dr Dennis Black

Postcranial skeleton of temnospondyls

Dr Anne Warren

Processes affecting recruitment into the breeding population of a long-lived seabird, the Short-tailed Shearwater *Puffinus tenuirostris*

Dr Catherine Meathrel

Production and characterisation of transgenic white clover for multiple virus resistance, increased aluminium tolerance and improved nutrient efficiency: Research studentship from DPI for F. Rossello

Dr Anthony Gendall

Protein digestion and requirements - a comparison between musk lorikeets *Glossopsitta conica* and rainbow lorikeets *Trichoglossus haematodus*

Dr Theresa Frankel

Protein metabolisability of pollen in rainbow lorikeets

Dr Theresa Frankel

Protein Profiling

Dr Ilya Levichkin

Mrs Kruti Patel

Ms Amelia Johnston

Ms Joan Hoogenraad

Professor Nick Hoogenraad

Protein Requirements and digestive enzymes of fat-tailed dunnarts

Dr Theresa Frankel

Regulation of Mitochondrial Biogenesis

Dr Jonathan Aldridge

Professor Nick Hoogenraad

Responses to oxygen and temperature in daphnia clones

Dr Peter Frappell

Retardation of Senescence in Arabidopsis Plants

Professor Roger Parish

River Murray Biological Monitoring Program - Review of macroinvertebrate data

Dr Phillip Suter

Role of Bell Miners in controlling psyllid predators and parasites

Dr Michael Clarke

Senescence and apoptosis in ageing human embryo fibroblasts

Dr Graham Flannery

Signal transduction in plants

Susanna Chung

Professor Roger Parish

Skeletal Muscle: Reversible temperature-induced uncoupling of contraction from the activator Ca^{2+} and tubular system roles in muscle function regulation

Professor Dimitrie Stephenson

States and transitions in remnant and agricultural grassy-dominated ecosystems

Dr John Morgan

Steroid hormones profiles in wild zebra finches: a study of an opportunistic breeding species

Dr Richard Zann

Structure & function of Myb DNA binding proteins from the plant *Arabidopsis thaliana*

Susanna Chung

Dr Song Li

Professor Roger Parish

Substrate recognition by AAA+ proteins: the role of adaptors

Mr David Dougan

Systematics of macropsine leaf

Professor Timothy New

Systematics of Neuroptera and Psocoptera

Professor Timothy New

Systematics of the Mayfly families Baetidae and caenidae (insecta: Ephemeroptera)

Dr Phillip Suter

Targets for Sustainable Control of Apple Blackspot

Dr Kim Plummer

Taxonomic Research on Nongeniculate Coralline Algae in New Zealand

Dr William Woelkerling

Taxonomic studies on Australian Millipedes (Diplopoda)

Dr Dennis Black

The ecology of alpine plant communities with changing snow regimes

Dr John Morgan

The extracranial blood vessels and nerves of the head of *Thylacinus cyanocephalus* (Marsupialia: Thylacinidae)

Dr Peter Pridmore

The genetic basis of stuttering

Professor Sheena Reilly

The influence of planktivorous fish on macroinvertebrate dynamics within slackwater patches of a temperate Australian floodplain river

Dr Phillip Suter

The reproductive biology and ecology of the black-eared miner (*Manorina melanotis*)

Dr Michael Clarke

The role of fungi in wetland carbon cycling

Dr Roger Croome

The Role of Molecular Chaperones and Proteases in Mitochondrial Function

Dr Pierre Faou

Professor Nick Hoogenraad

The role of molecular chaperones in protein targets to mitochondria

Dr Pierre Faou

Professor Nick Hoogenraad

Three-dimensional structures, substrate specificities and catalytic mechanisms of polysaccharide synthases

Professor Bruce Stone

Trafficking of the malaria parasite cytoadherence antigen, PfEMP1

Professor Leann Tilley

Unified approach to studies on mitochondrial biogenesis

Dr Michael Ryan

Use of Y-chromosome polymorphism to investigate human evolution and sex-specific migration

Dr Robert Mitchell

Vertebrate taphonomy of the Ducabrook formation

Dr Anne Warren

Virus induced gene silencing in white clover as a tool in functional genomics

Professor German Spangenberg

Professor Roger Parish

Wetland ecology - factors affecting vegetation type and structure

Dr Roger Croome

When to Flower - analysis of a novel genetic locus (FLH) that accelerates flowering

Dr Anthony Gendall

(280000) Information, Computing and Communication Sciences

An investigation into the estimation of organic carbon in soil using artificial intelligence

Dr John McCullagh

Mr Timothy Whitfort

Demonstrating the potential of travel recommender systems

Dr Andrew Skabar

Development of a new transport layer protocol to provide secure broadband internet connections via satellite to rural and remote areas

Dr Boon Soh

E.books-cost, benefits and quality of digitization of whole works

Ms Ann Copeland

Ms Eva Fisch

Ms Lea Beranek

Expert Systems using computational intelligence techniques for optimising and controlling the mineral ball making process

Dr Dianhui Wang

Forensic Image Mining: A case for mining shoe marks in crime scenes (administered by Monash University)

Dr Seyed Torabi

Knowledge Discovery in Discretionary Legal Domains

Professor Tania Sourdin

Medical information systems interoperability and retrieval

A/Prof Johanna Rahayu

mfpic: Pictures in TeX and METAFONT

Mr Geoffrey Tobin

Ontology Based Multisite Distributed Software Development

A/Prof Johanna Rahayu

Optimisation of a computer based measurement methodology to assist in the forensic comparison of handwriting traces

Dr Bryan Found

Dr Douglas Rogers

Setspace: line spacing in LaTeX

Mr Geoffrey Tobin

Sharemarket investing using artificial intelligence

Dr John McCullagh

Trusted Environment for Virtual Collaboration

A/Prof Johanna Rahayu

Voice Recognition Research - Project 5

Professor Laurence Cahill

Where and why students choose to use computer facilities: a collaborative study at an Australian and United Kingdom university

Ms Lea Beranek
Ms Liz Burke

(290000) Engineering and Technology

Clinical Monitoring

Mr Paul Junor

Demonstrating New Surface and Morphology Characterization Technologies

A/Prof Paul Pigram

Digital Tasman International Geospace Environment Radar (TIGER) Project

Dr John Devlin

Mr James Whittington

Fibre-Optic Sensors

Professor Laurence Cahill

Finite element methods

Dr Joseph Petrolito

Investigation on the ability of nano-sized capsules to penetrate plant tissues and become available in vivo

Dr Kim Plummer

Metal injection moulding of aluminium

Professor Xiangkang Yin

Modelling for Direct Auditory Brainstem Stimulation

Dr Antonio Paolini

Mr Graeme Rathbone

Mr Paul Junor

Numerical Techniques for Computational Mechanics

Dr Joseph Petrolito

Optimal subspace techniques for parameter estimation in wireless communication systems

Dr Song Wang

Optimising paint adhesion to polymers

A/Prof Paul Pigram

Photonic Integrated Circuits

Professor Laurence Cahill

Radar Applications

Dr John Devlin

Mr Peter Stewart

Radio Channel Modelling

Mr Michael Feramez

Radio Channel Sounding

Mr Michael Feramez

SIMO blind channel identification

Dr Song Wang

SS-TDMA Scheduling Algorithms

Mr Geoffrey Tobin

Study of ceramics within visual arts

Mr Anthony Conway

Teaching Physics and Engineering

Dr Joseph Petrolito

Dr Katherine Legge

The Application of Numerical Techniques to Nonlinear Structural Analysis

Dr Joseph Petrolito

Dr Katherine Legge

The use of wavelets for radar data analysis

Mr James Royston

Training for RedR Australia

Mr Malcolm Haysom

Use of Gypsum-Based Backfills in Mining

Dr Joseph Petrolito

Mr Ross Anderson

Vision Based Collision Avoidance (Auto CRC Initial Project 4)

Professor Laurence Cahill

Whole of Life Engineering - Project 19 (05/06)

Professor Laurence Cahill

(300000) Agricultural, Veterinary and Environmental Sciences

A novel male sterility system for canola and wheat

Dr Song Li

Professor Roger Parish

Bacterial resistance to antibacterials

Dr Richard Luke

Carbon and water dynamics of peat soils in the Australian Alps

Dr Judith Tisdall
Mr Warwick Papst

Combating subsoil acidity for sustainable production through managing plant cation-anion uptake

Dr Caixian Tang

Developing best management practises for managing nutrients - administered through Uni Melbourne

Dr Caixian Tang

Development and evaluation of transgenic white clover plants for enhanced aluminium tolerance and phosphorus acquisition efficiency

Dr Peter Sale

Epidemiology of lettuce white rot disease (caused by the fungus *Sclerotinia minor*) and biological control of the disease using mycoparasitic soil-borne fungi

Dr Philip Keane

Faecal antigen detection of sheep nematode parasites

Dr Richard Sandeman

Genetics and Conservation of the Helmeted Honeyeater

Dr Neil Murray
Ms Monica Ivanyi

Genetics and Conservation of the Orange-Bellied Parrot

Dr Neil Murray
Ms Monica Ivanyi

Horizontal climbing performance in (the striped possum, *Dactylopsila trivirgata* (Marsupialia: Petauridae)

Dr Peter Pridmore

How long can Australian agriculture neglect fortuitous biological control as a sustainable provider of pest control

Professor Ary Hoffmann

Identification of target molecules to produce new controls for sheep blowfly

Dr Richard Sandeman

Immunity in neonatal calves

Dr Theresa Frankel

Improved soil management on rain-fed vertisols in Nusa Tenggara

Dr Judith Tisdall

Improving Water Resource Management in India's Agriculture: Search for Effective Institutional Arrangements and Policy Frameworks

Dr Lin Crase

Lake Hume Land and On-water Management Plan: Establishing the Social/Community and Economic context

Dr Lin Crase

Managing subsoil constraints for increased productivity and water use efficiency

Dr Caixian Tang

Dr Jaikiran Gill

Dr Peter Sale

Mechanisms of subsoil amelioration by organic amendments

Dr Caixian Tang

Dr Peter Sale

Microbial iron metabolism

Dr Richard Luke

Modelling stormwater improvement in the Bungambrawatha catchment, Albury Shire

Mr Martin Fussell

Optimising root volume through soil amelioration

Dr Judith Tisdall

Phytoremediation: heavy metal interactions in the plant-soil system

Dr Caixian Tang

PIRSA seals & aquaculture initiative

Dr Simon Goldsworthy

Potassium nutrition in grape vines

Dr Caixian Tang

Dr Judith Tisdall

Protection of wheat anthers against frost damage

Professor Roger Parish

Protozoa and pathogenic bacteria

Dr Richard Luke

Quantification of ecological benefits associated with wetland rehabilitation along the Murray River floodplain

Dr Phillip Suter

Ravenswood Wildlife Underpass Monitoring

Dr Ruth Lawrence

Risk assessment for the release of transgenic white clover and perennial ryegrass

Dr Anthony Gendall
Professor Roger Parish

Role of boron nutrition on flowering quality hens chicken disease control in grape (vitis spp)

Dr Caixian Tang
Dr Judith Tisdall

Sequencing of bovine herpes virus 2 genes in developed vaccine strains

Dr John May

Silencing of genes in plant fungal disease

Dr Kim Plummer

Sustainable salt exclusion by salt tolerant rootstocks

Dr Judith Tisdall

The development of gut-associated (mucosal) immune system of neonatal calves and effects of dietary additives

Dr Theresa Frankel

Transgenic pastures - deployment of transgenic technologies in forages - Designer endophytes

Dr Anthony Gendall
Professor Roger Parish

Use of *Distichlis spicata* for sustainable forage production on saline land to manage dryland salinity

Dr Caixian Tang
Dr Peter Sale

Use of *Distichlis spicata* for sustainable forage production on saline land to manage dryland salinity

Dr Caixian Tang
Dr Peter Sale

(310000) Architecture, Urban Environment and Building

Community-Campus Partnership for Violence Prevention

A/Prof Beverly Walker
Dr Priscilla Robinson
Mr Frederick Hayes
Professor Vivian Lin

Disability and Local Government settings: Building inclusive communities

Dr Christine Bigby
Professor Hal Swerissen

(320000) Medical and Health Sciences

A comparison of rehabilitation strategies to ameliorate central vision loss

Mrs Meri Vukicevic

A critique of integrated patient care across acute and primary care services

A/Prof Beverly Walker

A longitudinal study of the experience of a relationship with a person with severe aphasia as perceived by individuals from within the social network

Dr Darrel Caulley

Dr Jacinta Douglas

A Multidisciplinary approach to evaluate & optimise school readiness: Phase 1 - Analysis of factors contributing to determining school readiness.

Dr Anne Ozanne

Dr Beverly Joffe

Dr Celeste Merrigan

Ms Christine Imms

Ms Chyrisse Heine

Ms Elspeth Froude

Ms Linda Santamaria

Ms Tanya Serry

A national, online interprofessional education strategy for rural and remote clinical educators

Dr Miranda Rose

A pilot study of protection and wellbeing in refugee and asylum seeker families

Dr Ignacio Correa-Velez

Professor Sandra Gifford

A profile of adolescent problem gambling: risk and protective factors informing prevention strategies

Dr Priscilla Robinson

Mr Paul O'Halloran

A qualitative study of women's experiences of motherhood and an examination of services provided for women suffering postnatal depression throughout Victoria

Dr Priscilla Robinson

Professor Pranee Liamputtong

A Search for the Silver Lining: Achieving best practice in Leg Ulcer Management

Professor Marilyn Annells

A student centred counselling/educational model of support/interventions to assist funded integration students

Dr Lawrence Moloney

A study of early stuttering

Dr Patricia Eadie

Dr Susan Block

Professor Sheena Reilly

A Survey of Recruitment and Retention Issues for Occupational Therapists Working Clinically in Mental Health

Dr Robyn Hayes

A Systemic Exploration of Mental Health Services as they relate to meeting the needs of Youth at Risk with a History of Childhood Sexual Abuse

Dr Lawrence Moloney

Action Learning in Management Projects

Dr Priscilla Robinson

Dr Sandra Leggat

Acute care nursing - A comparison of two methods of renal replacement therapy (PhD thesis)

Dr Eric Koch

Professor Rhonda Nay

Adult sibling Relationships, Attachments and Parent-Child Relationships

Dr Lawrence Moloney

Allied Health: Development of Cost Effective Services

Professor Geoffrey Prideaux

Professor Stephen Duckett

An alternative approach to health education delivery

Dr Jane Pierson

An assessment of factors which predict the support needs of people with serious mental illness

Dr Robyn Hayes

'An evaluation of occupational therapy and modified constraint induced movement therapy following Botulinum toxin-A injection in the upper limb in children with spastic hemiplegic cerebral palsy'

Ms Christine Imms

An evaluation of the effectiveness of the No Falls Exercise Program as an intervention to increase physical activity levels and falls efficacy in previously sedentary older adults

Dr Tracy Fortune

An evidence based assessment of rehabilitation strategies appropriate to persons with centre field loss: functional outcomes and cost-effectiveness analysis

Dr Kerry Fitzmaurice

An exploration into the 'As If' quality of empathy and transference in the therapeutic relationship.

Mrs Elvie Rumbold

An exploration of place, space and chronic illness

Professor Marilyn Annells

An exploration of the relationship between physical function and self perception in children with spastic diplegic cerebral palsy
