

Library of Successful NHMRC grants

For distribution to La Trobe University Staff ONLY

NHMRC Project Grants – proposals only

CI name	School	ID number	Proposal title
Professor Graham Lamb	School of Life Sciences	433034	Investigation of the roles of calcium dependent proteases in muscle damage and disease
Dr Christine Hawkins	School of Molecular Sciences	433007	Evolutionary conservation of caspase regulatory mechanisms
Dr Mike Ryan	School of Molecular Sciences	433028	Assembly of mitochondrial respiratory complexes and defects associated with disease
Dr Mike Ryan	School of Molecular Sciences	433029	Regulation of mitochondrial fission, fusion and distribution
Dr John Silke	School of Molecular Sciences	433013	Apo2L/TRAIL killing of tumour cells and the role of Inhibitor of Apoptosis proteins
Professor Leann Tilley	School of Molecular Sciences	433005	Trafficking of the cytoadherence-mediating protein to the host cell surface in malaria parasite-infected erythrocytes

To request a copy of one or more of these proposals please e-mail c.jaggs@latrobe.edu.au
