

## Emergency contact numbers

For all emergencies (where peoples' lives are in immediate danger or there is a treat to property or assets) contact the security emergency number for your specific campus.

If the call is not answered you should contact the emergencies services directly on:

**000** (or 112) (from some mobile phones).

Remember at some campuses you will need to dial '0' or '9' to get an outside line before dialling the number/

You will need to provide the emergency operator or security operator the following information:

- Your name
- Your location: *For example - La Trobe University, Bundoora campus, Biological Science 2, second floor, Room 216*
- Your telephone number
- The nature of the incident: *For example – a chemical spill with 4 people injured and unconscious*
- The emergency services you require: *for example fire and ambulance*

After contacting the emergency services you should try to contact Security again. This is so that they can respond, provide assistance and be prepared to escort the emergency services to the scene of the incident.
