Netball Victoria commissioned the Centre for Sport and Social Impact at La Trobe University to undertake an evaluation of the Netball For All Program funded by VicHealth. Netball for All is a program developed by Netball Victoria in partnership with VicHealth to provide a more welcoming and inclusive environment for diverse participants.

The Netball For All Program evaluation was designed with a qualitative approach to ensure both a breadth of perspectives and a depth of understanding of the key issues, challenges and outcomes of the program. Data were analysed through a coding process to identify key themes and patterns.

**Phase One** – Program evaluation involved 25 interviews with sample groups of stakeholder representatives.

**Phase Two** – Participant Outcome evaluation involved four focus group interviews with a sample of students from participating schools.

The evaluation also included a survey on inclusion and diversity awareness and attitudes to the board and staff that informed cultural change and training in the organisation.

The evaluation report provided Netball Victoria with feedback on the following themes that emerged from the data analysis:

- Program awareness and delivery
- Barriers to conversion
- Cultural and diversity awareness
- Impact on practice

Recommendations were made for further development of the Netball For All program.
