

La Trobe Business School presents, as part of the 11th Financial Markets and Corporate Governance Conference (FMCG):

# THE FUTURE OF SUPERFUND INVESTING

Plenary Panel Session: *Responsible Investments—How the pandemic has changed the way super funds think about investing—Artificial intelligence*

*Moderator*

**Mr Rob Fowler**, CFA Society Melbourne

Rob Fowler CFA is the former Chief Investment Officer of HESTA super fund. Rob retired from HESTA in 2019 and is currently Chair of the Professional Learning Committee of the CFA Society Melbourne, and holds a number of advisory and director roles. Prior to joining HESTA in 2004, Rob held various roles within the investment industry and in chartered accounting.

*Panel Members*

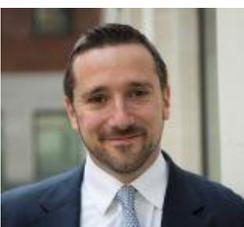

**Ms Mary Delahunty**, Head of Impact, HESTA

Mary is the Head of Impact for HESTA and has been with the fund since early 2013. She has held senior roles in financial services organisations for over 15 years and is passionate about progressing responsible investment practices and gender equality. Mary is a 2015 Churchill Fellow, awarded for the completion of international research on equity for women in pension systems, a Chair of the Ministerial Advisory Council for Gender Equality in the State of Victoria, and sits on the Advisory Board for the McKell Institute.

**Mr Mark Delaney**, CFA, CIO, AustralianSuper

Mark was appointed Chief Investment Officer and Deputy CEO of AustralianSuper in July 2006 after the ARF and STA merger. Mark has the formidable responsibility of investing currently around \$200 billion of member's retirement savings. He has expanded AustralianSuper's in-house investment management capabilities combining this with external advisers to continue to deliver top quartile investment returns. Mark has over 20 years' experience in financial markets.

**Dr Michael Kollo**, Chief Economist, Faethm

Michael gained his PhD in Finance from the LSE before embarking on a career in quantitative asset management, working at a suite of sophisticated institutional asset managers, where he led research teams and spoke globally on applying quantitative techniques in asset management, the limits and applications of machine learning, and the applications of alternative data for different investment problems. Michael joined Faethm.AI in 2020, a SaaS company focused on defining and measuring the impact of technology on the global workforce, and the automation impact on global industries, firms and societies.
