

## Technology Intern (Opportunity for Engineering, Finance & Economics students)

### Internship Details

Hours: 80	Start Date: October 2017
Location: Southbank	Closing date: Monday 25 September

### The Australian Ballet

The Australian Ballet exists to inspire, delight and challenge audiences through the power of its performances.

The Australian Ballet is one of the world's premier ballet companies and has delivered extraordinary performances for over 50 years. A commitment to artistic excellence, a spirited style and a willingness to take risks have defined the company from its earliest days, both onstage and off.

The company regularly represents Australia on the world stage and has performed to critical acclaim in 87 cities worldwide including New York, Shanghai, Tokyo, London and Paris. Caring for tradition yet daring to be different, The Australian Ballet performs beloved classical ballets and commissions new work annually. The Australian Ballet presents upwards of 250 shows and 1,700 education and audience engagement events each year.

In addition to 80 exceptional dancers, The Australian Ballet employs master craftspeople and leaders in production and technical support, dance education, marketing, philanthropy, finance, IT, human resources, external relations as well as an orchestra of 62 musicians (Orchestra Victoria).

### Internship

The Australian Ballet is looking for an intern to join our Technology team. Our Technology division is responsible for The Australian Ballet's core technology solutions and offerings throughout the business.

The Technology team leverages technology to help drive business improvement, develop new ideas and concepts, and provide insights into different technologies that The Australian Ballet should utilise.

This intern should be prepared to work in a fast-paced team environment, and will finish the co-curricular internship having gained broad experience in various aspects of some broad areas in Technology.

Tasks include:

- Assist in the design, development and delivery of Online Solutions such as a VIP ticketing System
- Assist in the design, development and delivery of a new reporting platform based on Microsoft technology
- Assist in the research and prototyping of the Azure platform areas such as machine learning,
- Assist in the design, development and delivery of a travel survey system utilising PowerApps and SharePoint online
- Design and develop a helpdesk bot that can provide first level support to end users.

## Selection Criteria

We are looking for undergraduates student who are majoring in Technology.

These undergraduates should have:

- Excellent verbal and written communication skills
- Knowledge and experience in development of web based applications
- Microsoft technology stack (from PowerApps, Azure to SharePoint)
- Data architecture skills and generally the drive to explore new technology and deep dive into development or design.

The student will enhance their skills by working across the whole SDLC.

## Hours of Work

The successful applicant can negotiate the hours and days of work with the host employer.

This is an 80 hour, unpaid co-curricular internship.

## Application Procedure

The closing date for applications is 4.00pm on Monday 25 September 2017. *Late applications will not be accepted.*
