

Neuroscience

Key transferable skills

Skills you will obtain in this degree that are transferable across many career options.

RESEARCH AND
EVALUATION

SYNTHESISE INFORMATION

IDENTIFY SOLUTIONS

LINK THEORY
AND PRACTICE

WORK WITH DIGITAL
TECHNOLOGY

CRITICAL THINKING

Being given the opportunity to design and conduct a neuroimaging study was an incredible experience. Having a solid foundation in the principles of research from my undergraduate studies meant that my experiment was a success.

Hayden Peel
PhD Candidate in Psychology

Career pathways

Graduates will be well placed to find employment in a range of roles directly or after further study. Common roles include:

- Academic
- Machine learning programmer
- Neuroimaging technician
- Behavioural researcher
- Drug researcher and developer
- Health educator
- Allied health professional
- Laboratory technician
- Policy adviser
- Genetic counsellor
- Mental health advocate
- Research assistant

Discipline specific/technical skills

Technical skills that you will develop as part of your course.

- Biomedical science literacy in a range of contexts
- Practical laboratory experience
- Adaptability and flexibility in a changing environment
- Targeted research and scientific report writing
- Ethical awareness in scientific and medical contexts
- Professional communication and interpersonal skills
- Advanced research and evaluation methods

Major employers

Graduates have found jobs in a range of organisations including:

- Universities
- The Florey Institute of Neuroscience and Mental Health
- Murdoch Children's Research Institute
- Mental health advocacy groups
- Pharmaceutical companies
- Clinical research institutes
- Imaging clinics
- Government departments and agencies
- Allied health services
- Global health organisations
- Hospital neuroscience departments
- Neurotechnology companies
