Appendix 2

Socio-demographic and behavioural profiles for survey participants

The following pages contain the socio-demographic data collected during the participant survey phase of the Mapping Gay Men's Communities project. For each of the 125 sites named in this report we have collected data from the men who named them. While this information as a whole provides a wonderful picture of the men who use Victoria's gay communities, we are expecting that most people who have made it to this appendix will be interested in a few, rather than all the sites. These data are arranged by site and there is a contents page to help you find the site, or sites, you are most interested in.

Reading the data: A how to guide

The purpose of this part of the document is to highlight and explain how to read the data associated with each site. What follows are preliminary analyses for each site that compares those men who named a site with those men who didn't. We have chosen the Laird Hotel as an example of how to read the data because it is a site named by sufficient men to allow inferences to be made from the findings.

Methodology

These data were collected from the Participant Survey during the third phase of the project. The survey was available either in hard copy or online and distributed from 163 sites within the gay communities of Victoria. Participants were recruited using a multi-pronged approach of online recruitment, hard copy survey distribution, direct recruitment in venues and recruitment through gay community press.

Explanation of analysis

Variables of interest

For each site we have analysed the responses by age, Aboriginal and Torres Strait Islander status, education, and a number of questions concerning sexuality, HIV/STI testing and diagnosis, drug and alcohol use and social and sexual networks. Using the Laird Hotel site as an example, this is what the tables mean.

Table 1: Age

Age:	Laird No	Yes	Total
16-19	47	0	47
20-29	106	34	140
30-39	107	75	182
40-49	89	86	175
50-59	63	28	91
60+	38	14	52
Not specified	81	35	116
Total	531	272	803

Pearson $\chi^2(6) = 54.6317$ Pr = 0.000

Of the 803 responses analysed, 272 named the Laird Hotel as a site in their network. These 272 responses are categorised into seven age categories. So, for example, none of the 272 responses came from men aged under twenty years of age; while 86 responses came from men in the age group 40-49. This represents 27.5% of all of the respondents who named the Laird Hotel.

The statistic that appears below this table (Pearson $\chi^2(6) = 54.6$ Pr = 0.0) tells us the degree of difference between the variables. For this example it tells us that the older respondents are more likely to name the Laird Hotel

as part of their network. A Pr value of less than 0.05 indicates that this difference is probably unlikely to have arisen purely through chance.

Table 2: Aboriginal or Torres Strait Islander origins

Are you of Aboriginal or Torres Strait Islander origin?	Laird		
	No	Yes	Total
Yes, Aboriginal	6	1	7
No, neither	519	268	787
Total	525	269	794

Pearson chi2(1) = 1.2103 Pr = 0.271

Table 2 shows us that of the 794 men who told us about their Aboriginal and Torres Strait Islander status only 7 were of Aboriginal and Torres Strait Islander origin. Of those 7 men only one named the Laird Hotel. These numbers are too small for us to conduct a statistical analysis of that finding.

Table 3: Education

Years of formal education	Laird		
	No	Yes	Total
0-6	2	0	2
7-11	98	36	134
Year 12/HSC	84	35	119
Tertiary	347	201	548
Total	531	272	803

Pearson chi2(3) = 6.9454 Pr = 0.074

Table 3 analyses the educational status of our respondents. Of the 272 men who named the Laird Hotel, the majority (201) reported they had achieved tertiary level education. The statistic indicates that this is no higher than the education level of all the respondents to the survey.

Table 4: Relationship status

Are you currently in an ongoing relationships with a man?	Laird		
	No	Yes	Total
Yes	244	127	371
No	287	145	432
Total	531	272	803

Pearson chi2(1) = 0.0396 Pr = 0.842

Table 4 shows us that of the 272 respondents who named the Laird Hotel, 127 (47%) reported they were currently in an ongoing relationship with a man. The statistical analysis below the table tells us that this percentage is no different from the overall relationship status of all the respondents to the survey.

Tables 5, 6, 7 and 8: Openness about sexuality

Table 5: Openness to friends

Your friends - How many of the following people know about your sexuality?	Laird		
	No	Yes	Total
None	12	1	13
A few	39	13	52
Some	37	21	58
Most	133	71	204
All	308	166	474
Total	529	272	801

Pearson $\chi^2(4) = 6.2945$ Pr = 0.178

Table 6: Openness to family

Your family - How many of the following people know about your sexuality?	Laird		
	No	Yes	Total
None	61	20	81
A few	50	15	65
Some	50	27	77
Most	96	59	155
All	272	151	423
Total	529	272	801

Pearson $\chi^2(4) = 8.3113$ Pr = 0.081

Table 7: Openness to workmates

Your workmates - How many of the following people know about your sexuality?	Laird		
	No	Yes	Total
None	71	21	92
A few	53	36	89
Some	53	43	96
Most	108	69	177
All	229	98	327
Total	514	267	781

Pearson $\chi^2(4) = 16.0221$ Pr = 0.003

Table 8: Openness to neighbours

Your neighbours - How many of the following people know about your sexuality?	Laird		Total
	No	Yes	
None	169	75	244
A few	89	61	150
Some	77	38	115
Most	82	50	132
All	111	48	159
Total	528	272	800

Pearson $\chi^2(4) = 6.0892$ Pr = 0.193

Tables 5, 6, 7 and 8 tell us about how open the respondents are about their sexuality. They are asked to indicate how many people know about their sexuality in different settings. So, for example, Table 7 tells us about workmates. Of the total sample who responded to this question (781 respondents), 92 said that none of their workmates knew about their sexuality. 7.8% (21 respondents) of those who named the Laird Hotel said that none of their workmates knew about their sexuality compared with 13.8% (71 respondents) of those who did not name the Laird Hotel. The statistic below the table tells us that these differences are significant.

Table 9: Friendship networks

How many of your friends are gay or homosexual men?	Laird		Total
	No	Yes	
None	20	3	23
A few	145	26	171
Some	219	105	324
Most	140	135	275
All	5	3	8
Total	529	272	801

Pearson $\chi^2(4) = 59.7755$ Pr = 0.000

Table 9 tells us about the friendship networks of the respondents who named the Laird Hotel. We asked respondents to indicate how many of their friends are gay or homosexual men. Of the 272 who named the Laird Hotel, 138 said that most or all of their friends were gay; this constitutes more than half (51%) of the Laird Hotel respondents compared with only 27% of those who did not name the Laird Hotel saying that most or all of their friends were gay. The statistic below the table tells us this is a highly significant finding.

Table 10: HIV testing patterns

Have you ever had an HIV test?	Laird		Total
	No	Yes	
No response	1	1	2
Yes	441	258	699
No	88	13	101
Total	530	272	802

Pearson $\chi^2(2) = 22.9840$ Pr = 0.000

Table 10 tells us about the HIV testing patterns of our respondents. Of the 272 men who named the Laird Hotel, 258 (94.8%) reported having had an HIV test. This compares with 441/530 (88.2%) in those men who did not mention the Laird Hotel. The statistic below tells us this is a highly significant difference.

Table 11: HIV test results

What was the result of your last test?	Laird		Total
	No	Yes	
pos	52	43	95
neg	378	211	589
unknown/not say	12	3	15
never tested	88	14	102
Total	530	271	801

Pearson $\chi^2(3) = 26.2909$ Pr = 0.000

Table 11 gives the result of the respondents' last HIV test. 43/ 271 (15.8%) of those who named the Laird Hotel reported their last test was positive compared with 52/ 430 (9.8%) of those who did not name the Laird Hotel. The statistic indicates this is a highly significant difference.

Table 12: STI testing patterns

Have you been tested for STIs other than HIV in the last 12 months?	Laird		Total
	No	Yes	
Yes	290	195	485
No	241	77	318
Total	531	272	803

Pearson $\chi^2(1) = 21.9303$ Pr = 0.000

Table 12 reports of testing patterns for STIs other than HIV in the last 12 months. Of those who named the Laird Hotel, 71.7% (195/ 272) reported an STI test compared with only 54.6% (290/ 531) of those who did not name the Laird Hotel. Again this difference is highly significant.

Table 13: STI diagnosis

Have you been diagnosed with a sexually transmissi- ble infection (STI/STD/V D) in	Laird		Total
	No	Yes	
Yes	40	37	77
No	491	235	726
Total	531	272	803

Pearson $\chi^2(1) = 7.6441$ Pr = 0.006

Not surprisingly given the finding just discussed, more men who named the Laird Hotel reported a diagnosis of an STI in the past 12 months than those men who did not name the Laird Hotel (15.7% versus 7.5%).

Table 14: Hepatitis C diagnosis

Have you been diagnosed with Hepatitis C?	Laird		Total
	No	Yes	
Yes	9	8	17
No	522	264	786
Total	531	272	803

Pearson $\chi^2(1) = 1.3481$ Pr = 0.246

Table 14 shows us that only 17 respondents from the whole sample had been diagnosed with Hepatitis C. These men split equally between those who named the Laird Hotel (8 responses) and those who don't (9 responses). These figures are too small to test statistically.

Tables 15, 16, 17, 18, 19 & 20: Drugs and alcohol

Table 15: Tobacco use

In the last 12 months how often have you smoked tobacco?	Laird		Total
	No	Yes	
4+ days/wk	117	76	193
3 or less/wk	19	8	27
< weekly	50	28	78
Never	345	160	505
Total	531	272	803

Pearson $\chi^2(3) = 4.0523$ Pr = 0.256

Table 16: Alcohol use

In the last 12 months how often have you drunk any alcohol?	Laird		Total
	No	Yes	
4+ days/wk	108	61	169
3 or less/wk	151	99	250
< weekly	216	101	317
Never	54	11	65
Total	529	272	801

Pearson $\chi^2(3) = 12.9248$ Pr = 0.005

Table 17: Cannabis use

In the last 12 months how often have you used cannabis?	Laird		Total
	No	Yes	
4+ days/wk	17	13	30
3 or less/wk	15	8	23
< weekly	85	56	141
Never	413	195	608
Total	530	272	802

Pearson $\chi^2(3) = 4.2334$ Pr = 0.237

Table 18: Methamphetamine use

In the last 12 months how often have you used methamphetamine (crystal or ice)?	Laird		Total
	No	Yes	
4+ days/wk	1	1	2
3 or less/wk	3	2	5
< weekly	43	34	77
Never	481	235	716
Total	528	272	800

Pearson $\chi^2(3) = 4.2909$ Pr = 0.232

Table 19: Any drug for non-medical purposes other than cannabis and methamphetamine

In the last 12 months, excluding cannabis and methamphetamine, how often have you	Laird		Total
	No	Yes	
4+ days/wk	2	1	3
3 or less/wk	3	2	5
< weekly	109	87	196
Never	412	181	593
Total	526	271	797

Pearson $\chi^2(3) = 12.7005$ Pr = 0.00

Table 20: Injected drugs

In the last 12 months how often have you injected any drugs for non-medical purp	Laird		Total
	No	Yes	
4+ days/wk	0	2	2
3 or less/wk	3	3	6
< weekly	17	8	25
Never	509	259	768
Total	529	272	801

Pearson $\chi^2(3) = 4.6397$ Pr = 0.200

Tables 15, 16, 17, 18, 19 and 20 tell us about drug and alcohol use. Examining these tables tells us that there are very few, if any, significant differences between those men who named the Laird Hotel and those who didn't in their patterns of drug and alcohol use.

A word of Caution

Whilst these tables can be explored in the ways we have outline above for the case of the Laird Hotel these findings must be treated with some caution as some apparent differences may be spurious or the consequence of chance. Tables need to be considered together in order to build a consistent and coherent account as we have tried to show in the analysis of testing patterns and in the analysis of being open to friends and family.
