

La Trobe internship with The Australian Ballet – China Tour 2018

I'm a third-year business management student at La Trobe University. La Trobe has helped me find my clever.

They've encouraged and empowered me to pursue my passions and it's all been facilitated through international opportunities and experiences.

Currently I'm in Beijing, China undertaking an internship with The Australian Ballet.

Dance has been a part of my life since I was 4 years old. I grew up dancing, singing, acting in musical theatre, drama, guitar so I have a huge passion for the creative arts and a huge appreciation for the ballet in particular.

So when this opportunity came about I was not only super excited for it as it's beneficial for my degree but also because it's a personal passion of mine.

They've supported me in all of my studies on and off campus and they have encouraged me to pursue my passions and have created opportunities for me.

I'm able to put what I'm learning in the classroom and put it into practice in an international setting.

I'm grateful for La Trobe. It's so culturally diverse and it exposes you to so many international ideas and international connections.

So being able to experience them on campus and then put it into practice in a global perspective is just really special and I feel so privileged to be able to have this student opportunity that La Trobe has provided and just for this whole experience to be able to have this internship with the best ballet company in Australia.
